

YORBEAU

Experience Vision Exploration
(TSX:YRB.A)

June, 2010

100% owned properties in Quebec include:

- **Rouyn:** aggressive exploration in 2008
- **Beschefer:** data compilation & review

Ellison property: royalty position on ground between Doyon and Bousquet mines

New strategy, team and program were put in place in **2008** to explore the Rouyn property:

- Discoveries in Augmitto-Astoria trend have excellent potential for expansion
- Previous investment by past owners supplied all existing infrastructure on the property, and provides a wealth of data
- Management intends to confirm value of gold resource and benefit from global demand for gold.

Augmitto headframe and service building

YORBEAU

- The presence of mafic-ultramafic volcanic rocks (good host rocks)
- Major breaks with curves-bends-jogs in the break (creates dilation and good fluid pathways)
- Well-developed sets of subsidiary faults and shears near the major break (more fluid pathways)
- District-wide carbonate alteration (related to gold deposition)
- Regional Timiskaming-like unconformity (indicates crustal instability at time of gold mineralization)
- Peak metamorphism not higher than greenschist facies (gold deposits not destroyed by tectonic forces)

All of which occur on Yorbeau's Rouyn Property

REGIONAL GEOLOGY & HISTORIC PRODUCTION

Longitudinal Section of Doyon-LaRonde Trend Showing Yorbeau's Ellison Property

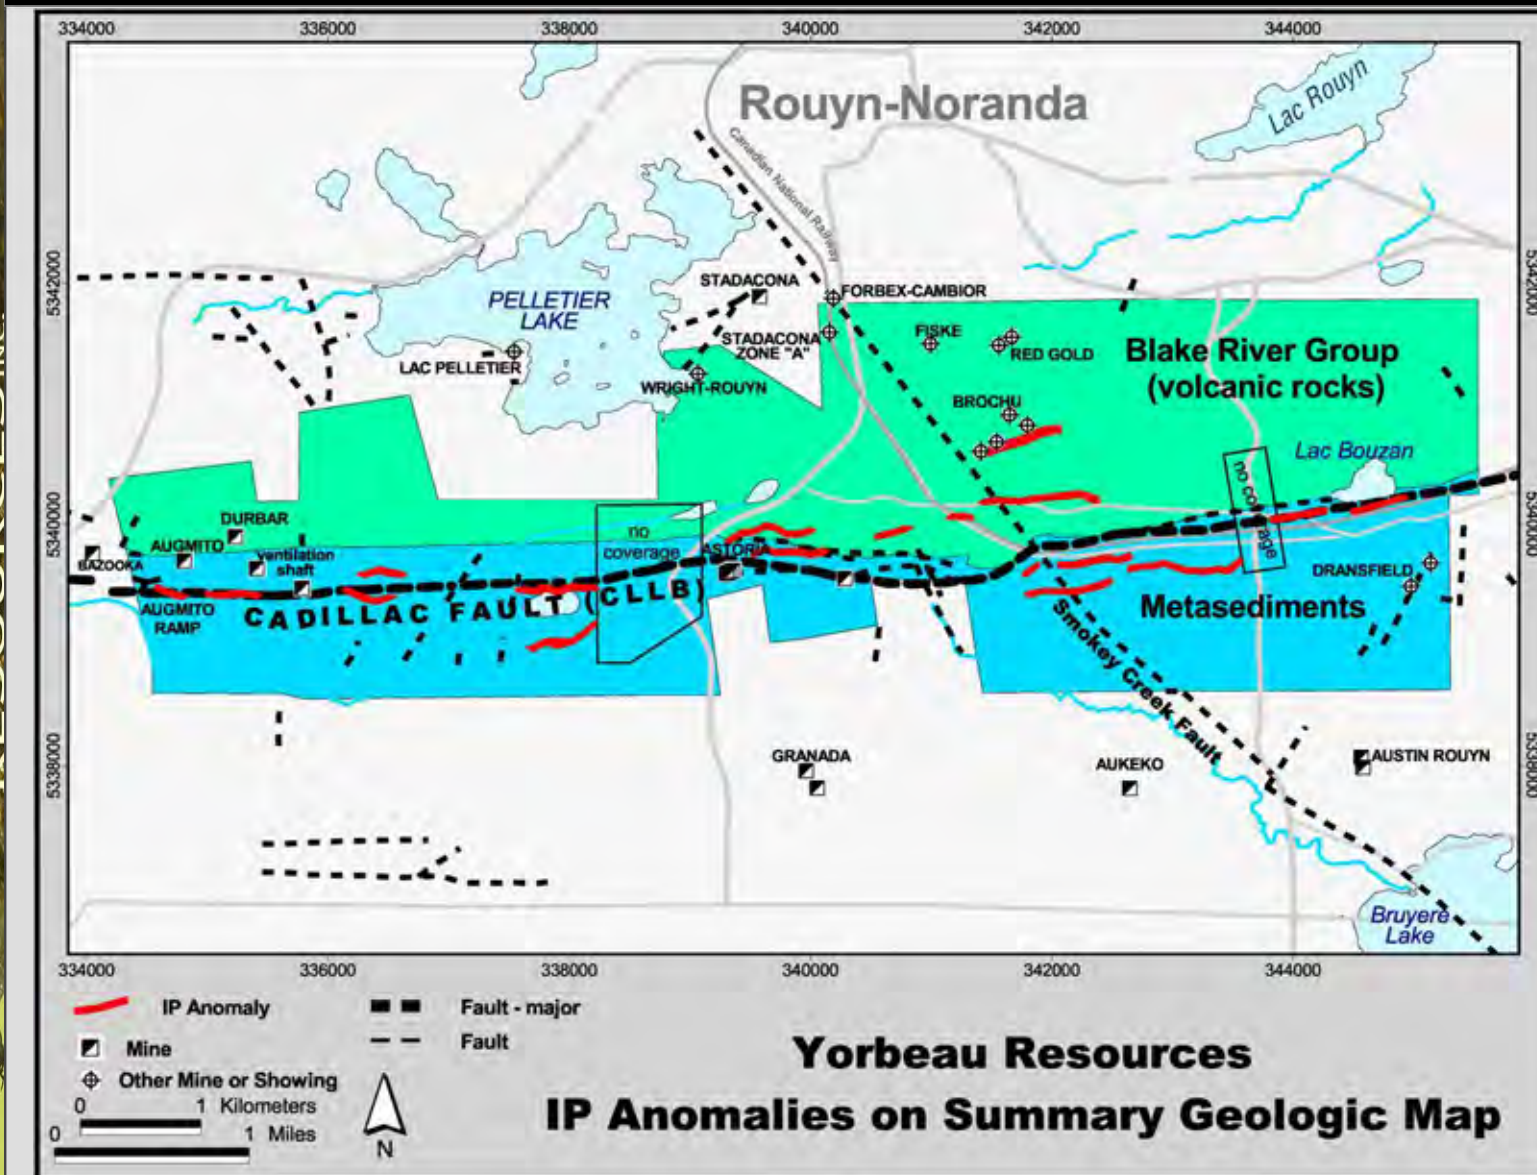

Extract from Agnico-Eagle Press Release 11/30/09: Additionally, the Company is exploring its Ellison property, located approximately four kilometres west of the LaRonde mine. One hole is being drilled from surface, targeting an extension of Iamgold's Westwood deposit, which is known to cross the boundary onto Ellison. The Westwood orebody begins approximately 2 kilometres below surface and is between the Ellison property and Iamgold's Doyon property, in the same favourable horizon as the Bousquet (past producer), LaRonde and Doyon mines. Drilling began November 9 and is anticipated to reach the target area in the first quarter of 2010.

Rouyn Property – Longitudinal Section

Partie ouest de la propriété Rouyn

- Augmitto and Astoria zones have not been explored to depth.
- Cinderella & Lake Gamble zones open along strike and to depth.
- There is an extensive section of this western portion of the property that is unexplored but has exciting discovery potential.
- Only a few holes have been drilled below 400 m in this area, resulting in large areas of untested potential at depth.
- Gold deposits in the Abitibi can extend to depths of +3,000 m.
- Existing workings provide lower cost access to new discoveries.

COMPARAISON DES LONGITUDINALES DE DÉPÔTS AURIFÈRES

- “Drill for structure, drift for grade”
- Industry presumption: If two out of five holes (40%) yield potential ore grade and width, then bulk sampling from underground is required to determine grade.
- Abitibi experience:
 - Kerr-Addison mine: two out of ten holes (20%; Kanwar, personal communication, 2007)
 - Belleterre mine: one out of ten holes (10%; Hallé, personal communication, 2009)
 - Dome mine (15 million ounces production): one out of four holes from the **ore zone** (25%; Poulsen, personal communication, 2009)
- At Lake Gamble gold zone: thirteen out of twenty-six holes (50%) yield potential ore grade and width.

- **OBJECTIVE:** by December 2010, have 43-101 compliant resource of over one million ounces of gold at Rouyn
- Evaluate Augmitto-Astoria trend of 6 km strike length
 - Phase I near completion: drilling to locate potentially significant gold zones
 - Phase II: evaluate and interpret data
 - Phase III:
 - Continue drilling Cinderella, Lake Gamble & the gaps between them
 - Drill Lake Gamble and Cinderella zones to depth
 - Drill Astoria below 600 m depth and to east
 - Drill Augmitto below 600 m depth and to west
- Drill other targets on Rouyn property as feasible
 - Wright-Rouyn
 - Brochu
 - Smokey Creek Fault
 - Lake Bouzan
 - West Bouzan

Officers & Directors

(TSX:YRB.A)

- **David Crevier, Chairman**, lawyer in private practice, involved in natural resource industry for last 25 years.
- **Thomas Robyn, President & CEO**, Ph.D., 30 years experience in management of mineral exploration projects, mineral property reviews for the capital markets, and advisor to private interests.
- **Mr. Ercan Ugur, CFO**, an executive involved in the exploration and development of base metal mining properties in the Abitibi region of Quebec. Mr. Ugur holds a Bachelor of Arts degree from the University of Bosphorus, Istanbul, Turkey and has been working in the mining industry since 1982.
- **Georges Bodnar Jr.**, C.A. was instrumental in assembling the land package of Yorbeau over the last 10 years.
- **Mr. Paul Einarson** is a Chartered Accountant. He holds a Bachelor of Commerce degree (Honours) from the University of Manitoba and is a member of the Institute of Chartered Accountants of Manitoba. Mr. Einarson was the Senior Director of Financial Reporting of Molson Inc. from September 2002 to March 2005 and the Chief Financial Officer of Diagem Inc., an exploration mining company, from July 2005 to January 2009. He is currently a financial management consultant assisting small- to medium-sized enterprises.
- **Philip Renaud**, international financial manager, Managing Director of Church Advisors.
- **Gérald Riverin**, Ph.D., expert on VMS deposits and exploration technology, discovered and developed Inmet's Troilus open pit gold-copper mine.

Forward-looking Statements

(TSX:YRB.A)

Statements in this presentation that relate to expectations, beliefs, forecasts, objectives, assumptions and future events or performance do not constitute historical facts but are rather considered to be forward-looking statements. Such statements generally contain terms including, but not limited to, “believes”, “does”, “expects”, “anticipates”, “estimates”, “forecasts”, “intends” and “plans”, as well as the use of the conditional tense. For instance, statements regarding financial condition, probable or expected future results of operation, growth prospects, market share, management’s plans and objectives, the market for our common shares or the future management and corporate structure are all forward-looking statements.

There can be no assurance that such statements will prove to be accurate. Such statements are subject to known and unknown risks, uncertainties and assumptions that could influence actual achievements and render them different from the expectations described or implied by forward-looking statements regarding results, activities, return or achievements.
