

YORBEAU RESOURCES INC.
(“Yorbeau” or the “Company”)

Management's Discussion and Analysis
for the period ended March 31, 2011

The following Management's Discussion and Analysis (“MD&A”) was prepared as at June 14, 2011 and should be read in conjunction with the Company's first quarter 2011 unaudited condensed interim financial statements and the accompanying notes, all of which form the First 2011 Quarterly Report, and the audited annual financial statements and the accompanying notes for the year ended December 31, 2010 and the related annual MD&A, all of which form the 2010 Annual Report. The Company's first quarter 2011 unaudited condensed interim financial statements and the accompanying notes form part of the first audited annual financial statements to be prepared in accordance with International Financial Reporting Standards (“IFRS” or “GAAP”) for the year ended December 31, 2011 and have been prepared in accordance with International Accounting Standard (“IAS”) 34, “Interim financial Reporting” as issued by the International Accounting Standards Board (“IASB”) and using the accounting policies described therein.

Certain statements contained in this MD&A constitute forward-looking statements. These statements involve known and unknown risks, uncertainties and other factors that may cause actual results to differ materially from those anticipated in such forward-looking statements. The Company believes the expectations reflected in these forward-looking statements are based on reasonable assumptions but no assurance can be given that these expectations will prove to be correct.

General

During the period ended March 31, 2011, the Company initiated its 2011 drilling program on its Rouyn property.

The program is largely focused on the Augmitto deposit in order to permit the completion of a resources calculation compliant with National Instrument 43-101 (“NI 43-101”). Yorbeau plans to drill about 10,000 metres of NQ core on the Augmitto and Cinderella portions of its Rouyn property during the first six months of 2011. At the Augmitto deposit, which is located at the western end of the Company's Rouyn property, the program will include some in-fill and definition drilling as well as the testing of deeper targets. These targets have been identified following the recognition of important controls for gold mineralization based on the recent re-interpretation of historical drilling and structural data.

To date, five drill holes have been completed on the Augmitto Block for which assay results have been received. These results show that the vicinity of the Augmitto mine is mineralized with gold in several horizons, although the Piché Group and Footwall Zone remain Yorbeau's primary targets (see the Company's press release dated May 31, 2011). Four drill holes have also been completed on the Beschefer property. However, the program was aborted because of technical problems in deep overburden combined with an unusual warm-up which softened the ground and caused the drill rig to become unstable and unsafe to operate. Sufficient work was completed that the entire Beschefer land position remains in good standing.

The Company has accepted a proposal from Roscoe Postle Associates Inc. to prepare a mineral resource estimate and supporting NI 43-101 Technical Report for the Augmitto Block. The resource estimate is scheduled for completion during the month of June.

Later in 2011, the Company intends to carry out a drill program of mostly in-fill and definition drilling at the Company's Lake Gamble and Cinderella East discoveries. This program will be followed up by additional resource estimates thereby growing the Company's NI 43-101 compliant resources in the four known gold deposits in the 6-km-long Augmitto-Astoria corridor.

Results of operations

During the three month period ended March 31, 2011, the Company recorded a loss of \$361,486 compared to a loss of \$299,941 for the corresponding period in the previous year. This represents a loss of \$0.01 per share. Interest and other revenues for the three months ended March 31, 2011 amounted to \$2,395. The expenses for the period totalled \$363,881, compared to \$301,064 for the period ending March 31, 2010. The administrative charges for the period increased by \$48,738 compared to the corresponding period in the previous year mainly as a result of an increase in legal fees, cost in public relations and staff. During the three month period ended March 31, 2011, the Company incurred a total of \$398,827 in exploration expenses (compared to \$650,136 for the corresponding period in the previous year), \$282,135 of which were spent on the Rouyn property and \$116,692 of which were spent on the Beschefer Property.

Summary of quarterly results

The following table sets forth selected quarterly financial information for each of the eight most recently completed quarters:

<u>Quarter ending</u>	<u>Revenue</u>	<u>Net profit (loss)</u>	<u>Net profit (loss) per share, basic and diluted</u>
March 31, 2011	\$2,395	\$(361,486)	\$(0.01)
December 31, 2010	\$706	\$(323,478)	\$(0.01)
September 30, 2010	\$409	\$(257,931)	\$(0.01)
June 30, 2010	\$2,969	\$(251,864)	\$(0.01)
March 31, 2010	\$1,123	\$87,441	\$ 0.01
December 31, 2009	\$154	\$(192,142)	\$(0.01)
September 30, 2009	\$60	\$(331,580)	\$(0.01)
June 30, 2009	\$0	\$(418,495)	\$(0.01)

The financial statements for the periods indicated above have been prepared in accordance with Canadian generally accepted accounting principles.

Liquidity

The Company has financed its operations almost exclusively through the sale of its shares and will continue to do so for the foreseeable future.

As at March 31, 2011, the Company had cash and short term deposits of \$1,730,939 compared to \$2,602,862 as at December 31, 2010. Working capital as at March 31, 2011 was \$2,396,213 compared to \$2,954,624 as at December 31, 2010. The decrease in working capital is a result of the Company's ongoing cost relating to its exploration program on the Rouyn property.

Critical Accounting Estimates

The preparation of the condensed interim financial statements in conformity with IFRS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

Information about assumptions and estimation uncertainties that have a significant risk of resulting in a material adjustment within the next financial year are as follows:

- Recoverability of mining properties and exploration and evaluation assets;
- Assessment of refundable tax credits related to resources and credit on mining duties;
- Estimate of the fair value of share-based payment and warrants;
- Recoverability of income tax assets;
- Estimate of the fair value of the liability related to flow-through shares.

Transition to IFRS

The Company has adopted IFRS for its first quarter 2011 unaudited condensed interim financial statements. These financial statements, including the 2010 comparative figures, are prepared in accordance with IFRS and IAS 34, "Interim Financial Reporting".

During the first quarter of 2011 management finalized its IFRS accounting policy choices. These accounting policies are consistent with those disclosed in the 2010 Annual Report and have been approved by the Company's Audit Committee. In addition, the Company has finalized its unaudited opening balance sheet as well as the unaudited financial statements for each of the 2010 quarters based on these accounting policies.

The Company has also completed changes to its internal controls over financial reporting and disclosure controls and procedures for IFRS, which included enhancement of existing controls and the design and implementation of new controls, where needed. No material change in internal controls over financial reporting or disclosure controls and procedures resulted from the adoption and implementation of IFRS.

Reconciliations prepared in accordance with IFRS 1, "First-Time Adoption of International Financial Reporting Standards" are provided in note 15 to the unaudited condensed interim financial statements.

Future Accounting Standards

The following new standards have been issued but are not yet applicable to the Company:

- (i) IFRS 9 Financial Instruments:

Effective for annual periods beginning on or after January 1, 2013, with earlier adoption permitted.

As part of the project to replace IAS 39, Financial Instruments: Recognition and Measurement, this standard retains but simplifies the mixed measurement model and establishes two primary measurement categories for financial assets. More specifically, the standard:

- deals with classification and measurement of financial assets;
- establishes two primary measurement categories for financial assets: amortized cost and fair value;
- prescribes that classification depends on entity's business model and the contractual cash flow characteristics of the financial asset;
- eliminates the existing categories: held to maturity, available for sale, and loans and receivables.

Certain changes were also made regarding the fair value option for financial liabilities and accounting for certain derivatives linked to unquoted equity instruments.

The extent of the impact of adoption of this new standard has not yet been determined.

(ii) IFRS 13 Fair Value Measurement

In May 2011, the IASB published IFRS 13 Fair Value Measurement, which is effective prospectively for annual periods beginning on or after January 1, 2013. The disclosure requirements of IFRS 13 need not be applied in comparative information for periods before initial application.

IFRS 13 replaces the fair value measurement guidance contained in individual IFRSs with a single source of fair value measurement guidance. It defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, i.e. an exit price. The standard also establishes a framework for measuring fair value and sets out disclosure requirements for fair value measurements to provide information that enables financial statement users to assess the methods and inputs used to develop fair value measurements and, for recurring fair value measurements that use significant unobservable inputs (Level 3), the effect of the measurements on profit or loss or other comprehensive income.

IFRS 13 explains 'how' to measure fair value when it is required or permitted by other IFRSs. IFRS 13 does not introduce new requirements to measure assets or liabilities at fair value, nor does it eliminate the practicability exceptions to fair value measurements that currently exist in certain standards.

The Company intends to adopt IFRS 13 prospectively in its financial statements for the annual period beginning on January 1, 2013. The Company does not expect IFRS 13 to have a material impact on the financial statements.

Disclosure controls and procedures

The Chief Executive Officer and the Chief Financial Officer of the Company have evaluated the effectiveness of the Company's disclosure controls and procedures as of the end of the period ended March 31, 2011. Based on that evaluation, the officers have concluded that as at that date, such disclosure controls and procedures contain a material weakness due to inadequate segregation of duties between the authorization, recording, review and reconciliation of purchases and sales and recording of cash receipts and bank account reconciliations. This material weakness has the potential to result in a material misstatement in the Company's financial statements, and should also be considered a material weakness in its internal control over financial reporting. The management and board of directors have concluded and agreed that, taking into account the present stage of the Company's development and the best interests of its shareholders, the Company does not have sufficient size and scale to warrant the hiring of additional staff to correct this weakness at this time.

Internal control over financial reporting

The Chief Executive Officer and the Chief Financial Officer of the Company have designed, or have caused to be designed under their supervision, internal control over financial reporting to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements in accordance with generally accepted auditing principles. The Chief Executive Officer and the Chief Financial Officer have evaluated the effectiveness of the Company's internal control over financial reporting as at March 31, 2011. Based on that evaluation, the officers have concluded that as at that date, such internal control over financial reporting contains a material weakness due to inadequate segregation of duties as previously mentioned in "Disclosure controls and procedures."

There has been no change in the Company's internal control over financial reporting that occurred during the period beginning on January 1, 2011 and ended March 31, 2011 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Transactions with related parties

David Crevier, the Chairman and a director of the Company is a partner of Colby, Monet, Demers, Delage & Crevier L.L.P., a law firm which has rendered legal services to the Company in an amount of \$82,980 for the three month period ended March 31, 2011.

During this period, Yorbeau paid \$53,475 to a company whose president and controlling shareholder is Thomas L. Robyn, the President and Chief Executive Officer of Yorbeau. In consideration for this payment, the company made available to Yorbeau the services of Mr. Robyn.

During the same period, Gérald Riverin, a director of Yorbeau, rendered consulting services to the Company in an amount of \$6,600 and a sum of \$12,500 was paid as an advance royalty payment to Société Minière Alta Inc., of which G. Bodnar Jr., a director of the Company, is the sole shareholder.

Outstanding Share Data

The authorized share capital of the Company consists of an unlimited number of Class A common shares of which 163,996,040 were issued and outstanding as at June 14, 2011. As of such date, the Company also had outstanding options to purchase a total of 5,780,000 shares at prices ranging from \$0.16 to \$0.35 per share.
