Yorbeau Announces Mining Analyst Report

Montreal, September 28, 2012 - Yorbeau Resources Inc. ("Yorbeau") is pleased to announce the completion of a detailed report on the Company co-authored by two Canadian mining analysts. A summary of the report may be found at [the following link](#). The full report may be found on the Company's new website at www.yorbeauresources.com.

The Company is currently conducting a significant drilling program on the Lake Gamble Block of its Rouyn property. Upon completion of the present drilling program, the Company is targeting the completion of NI 43-101 compliant resource estimates for both the Lake Gamble and Cinderella Blocks. These estimates are expected to be available in the first quarter of 2013. When added to the two previous resource estimates on the adjoining Augmitto and Astoria Blocks, the Company will be able to present mineral resources in four individual blocks along a continuous 6 km long corridor in the western portion of the property which hosts substantial underground and surface infrastructure in place.

About Yorbeau Resources Inc.

The raison d'être of Yorbeau is to identify a world class gold deposit in a major mining camp. Against the backdrop of a market that is steadily more welcoming for gold, Yorbeau is poised to significantly increase the known gold resources on its properties in Northern Quebec.
